

Quick Setup Guide

Staff Paging System

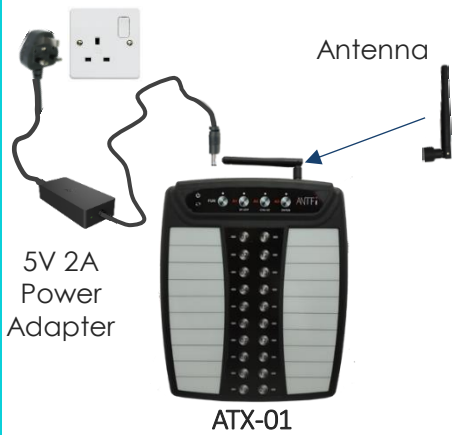

Components

- ANTFI Staff Paging Transmitter (ATX-01)
- SPC-01 10-slots Charger Base
- SP-01Pro Belt Pager Receiver
- 5V 4A Power Adapter

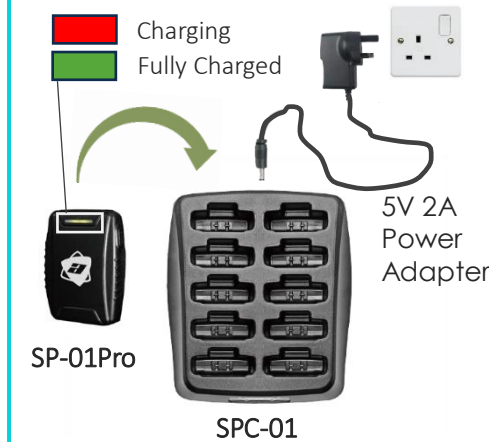

Setup Guide

Step 1

Connect antenna to the ATX-01 Transmitter. Next, plug the power adapter to the ATX-01 and 3 pin plug into the electrical wall outlet. A surge protector is higher recommended.

Step 2

Plug the power adapter to the SPC-01 10-Slots Charger Base and the 3-pin plug into the electrical wall outlet. Then slot all the SP-01Pro Belt Pagers into the SPC-01 charging slot.

Step 3

Once the SP-01Pro belt pagers are fully charged, issue the pagers to the respective waiters.

Usage Guide

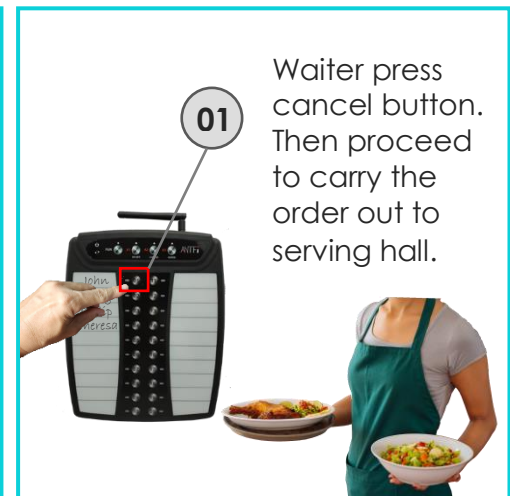

Step 1

When the order is ready, the chef will press for the respective runner "John" button "1" from the ATX-01. Then he will move on with the other orders.

Step 2

Waiter at serving hall will receive the alert from the kitchen when the chef pressed the ATX-01. Once received, the waiter will go into the kitchen to collect the food.

Step 3

Once the waiter reach the kitchen, he should press the button "1" to stop the alert reminder. This will help the busy chef to know that the alert has been attended.
